Subject: Follow up from Construction Meeting 3/29/18

Hello Jeff. Following up with you on a couple of issues we talked about at the meeting.

1. Could you let me know what are the lease conditions regarding what we can sample based on employee concerns or other circumstances?
2. As we look into the end of phase 1 and Boots conducts the IAQ post construction sampling, and we are trying to save time, it seems that Boots wanted Buehler to hold movement until IAQ sample results are back. Boots/Waring should know that if they want information faster they can pay for 24 hr. turnaround sample results. Just a thought so we do not incur on any additional delays.
